FRP/GRP CABLE TRAYS

KRIZA provides customers with a range of FRP Cable Tray. The pultrusion process is used to manufacture the cable trays, guaranteeing a high standard of quality, affordable and resistant to all types of chemical assaults.

The world's most corrosive and structurally demanding settings such as "water treatment facilities, chemical plants, and many mores industries" can use FRP cable trays.

PERFORATED TYPE CABLE TRAY

The perforated type c channel solid bottom pre-drilled cable tray is designed for light loads namely instrumentation and control cable and for transition from cable tray to individuals control points.

LADDER TYPE CABLE TRAYS

The ladder type system comprises two channel or I-beam side rails connected by transverse rungs. All rungs to side channel or I-beam connected with mechanical and chemical (adhesive). The space between rungs is 300 mm. Cable Trays are joined by coupler.

FRP PERFORATED TYPE CABLE TRAY

Width (mm)	Height (mm)	Length (m)	Colour	Resin Type	Accessories
50	50	3 or as per Customer's requirement	Grey White or others	Polyester / Vinyl Ester	Bend, Tee, Cover, Cross
100	50/100				
150	50				
200	50/100				
300	50/100				
400	50/100				
450	100				
500	100				
600	50/100/150				

FRP LADDER TYPE CABLE TRAY

Width (mm)	Height (mm)	Length (m)	Colour	Resin Type	Accessories
100	75/100	3 or as per Customer's requirement	Grey White or others	Polyester / Vinyl Ester	Bend, Tee, Cover, Cross
300	75/100				
400	100/150				
500	100/150				
600	100/150				
700	100/150				
1000	100/150				
1200	100/150				
1400	100/150				

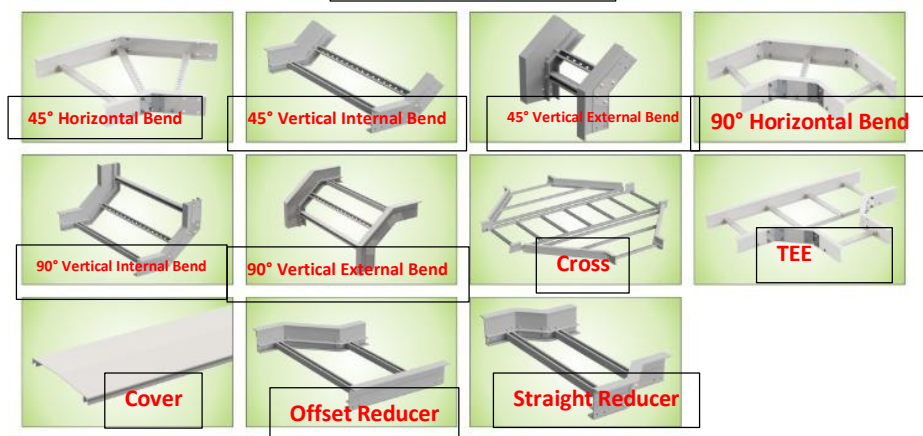

CABLE TRAY ACCECORIES

Add "PERFORATED TYPE"

CABLE TRAY ACCECORIES Add "LADDER TYPE"

Application of FRP Cable Tray

- Chemical & Fertilizer Industry
- Water and Waste Water Plants
- Offshore/Onshore Platforms
- Petro-chemical & Refineries
- Marine Industry
- Oil & Gas Sector
- Pharma Industry
- Power Plants
- Paper Industry
- Building Construction

FRP GRATINGS

Kriza is a world-class FRP Grating manufacturer that provides corrosion resistance, Fire Retardant, UV Resistance, long life & easy to fabricate FRP grating. We have the latest technology which produces high strength FRP Grating to bear maximum load capacity with minimum deflection.

Kriza have manufacturing FRP GRP moulded and Pultruded Grating. We have supplied our grating to major chemical, Refineries & offshore industries in harsh conditions. Our grating life is a minimum of 25 years.

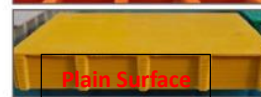

MOULDED FRP GRATINGS

KRIZA FRP Moulded grating is manufactured in an open, heated mould system by professional skilled workers. Continuous glass roving is laid down in the mould in alternating layers in both directions and completely wetted out with resin. This continuous process produces an integral plate which provides excellent corrosion resistance as well as bi-directional strength. These gratings are available in polyester, vinyl ester or phenolic resin which are all self-extinguishing and UV resistance for added durability and safety.

FRP LADDER TYPE CABLE TRAY FRP MOULDED GRATING

Width (mm)	Mech Description & Size (mm)	Rib Thickness (mm)	Open Area %	Panel Size (mm)
25	Square (38 X38)	5-7	68%	1220X3660, 1000X4000, 1220X4000
30	Square (38 X38)	5-7	68%	1220X3660, 1000X4000, 1220X4000
38	Square (38 X38)	5-7	68%	1220X3660, 1000X4000, 1220X4000, 1500X4000
50	Square (38 X38)	5-7	71%	1220X3660, 1000X4000, 1220X4000, 1500X4000

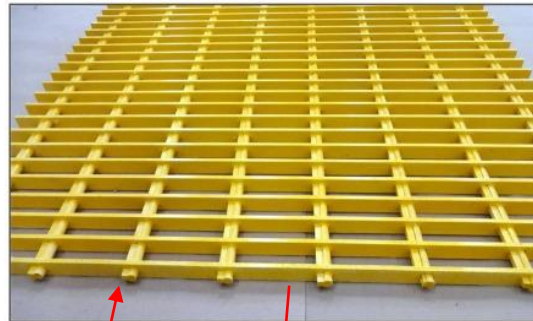

Pultruded FRP Gratings

Kriza is a composite manufacturer that produces FRP (Fiber Reinforced Polymer) pultruded gratings in addition to their FRP moulded gratings. FRP pultruded gratings are made by pulling continuous fibres through a resin bath and then through a heated die to form a rigid, durable panel. Their Light Weight design, easy installation, good performance and cost effectiveness makes its better choice in major industries.

PULTRUDED GRATING SURFACE

Accessories

- M-Clip
- C-Clip
- Application
- FRP Fencing and Walkway
- Water and Waste Water Treatment Plant
- Trench Covers
- Staircase
- Flooring
- Swimming Pool Overflow
- Elevated Car Parking
- Earth Pit Cover
- Solar Walk Way Cover

FRP Hand Rails & Fencing

FRP Handrail are better than traditional steel and aluminium because of they have corrosion resistance, Long Life, light weight, less Cost and low maintenance. FRP Handrails mainly used Industries and commercial projects.

Application

- Industrial Platform
- Water and Waste Water Plant
- Chemical Storage Tank
- Railway Two Sides Guardrail
- Coastal Guardrail
- Transformer Fencing
- Boundary Fencing

Features of FRP Handrails

- High strength
- Light weight
- Superb anti corrosion performance
- Maintenance free
- Electric, heat, and sound insulation
- Easy installation
- UV protected
- Electronically transparent
- Anti skid/slip
- Fire retardant

GRP/FRP POLES & MASTS

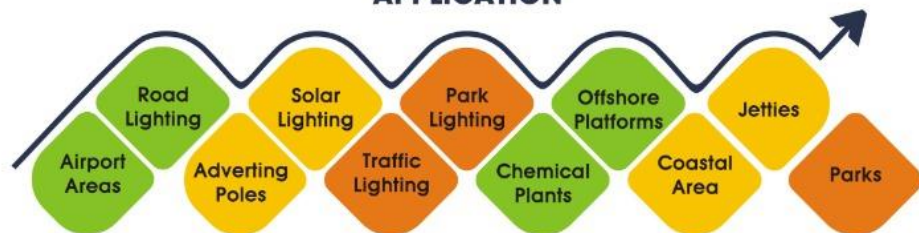

KRIZA FRP/GRP poles provide a solution to common issues and are suitable for use in environments where poles made of other materials have substantial corrosion issues, such as coastal areas, chemical zones, marshlands, and regions with significant temperature swings. KRIZA FRP/GRP Poles have a long lifespan, are non-corrosive, and can be used in a variety of settings. No surface preparation is necessary, as it is with conventional poles. Due to its small weight, ability to be carried by hand to inaccessible locations, lack of surface treatments, grounding, and painting requirements, composite pole installation proves to be cost-effective.

FRP PULTRUDED PROFILE & CANOPY

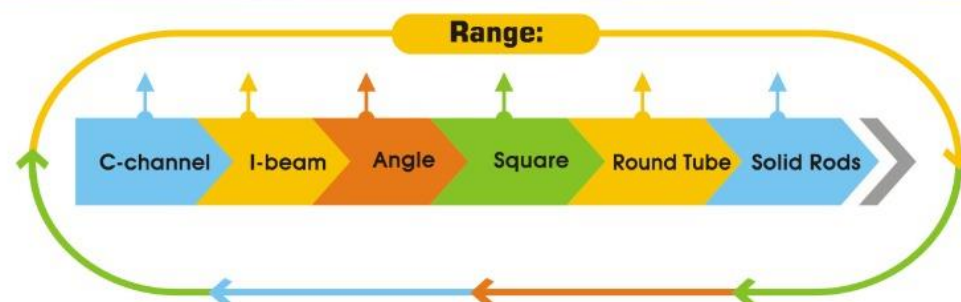

As one of the leading producers of FRP profile, KRIZA Composite has a long history of producing FRP profile sections. The fact that our sections are made from tested raw materials and then meticulously examined at our testing centre allows us to produce FRP pultruded profiles of the highest quality. As one of the few producers with a third-party quality testing facility, we provide a variety of products. (Photo-44)

ABOUT KRIZA

KRIZA FRP PRODUCTS specializes in manufacturing of various FRP/GRP (Fibre reinforced Plastic) products for industrial and recreational uses. KRIZA is art offers High-quality advanced composite solutions with reasonable price and meeting our customers' expectations with satisfaction solutions.

We are providing complete solution with conceptual design, manufacturing, product development, Installation and after sales support.

KRIZA provide total Turkey solutions and detailed engineering services to chemical, petrochemical, Oil & Gas, Water & Waste Water Industry, Power & Energy, Offshore, Electrical industry, Real Estate, Defence, Colling Tower and steel Industry with all our FRP Products.

VISION

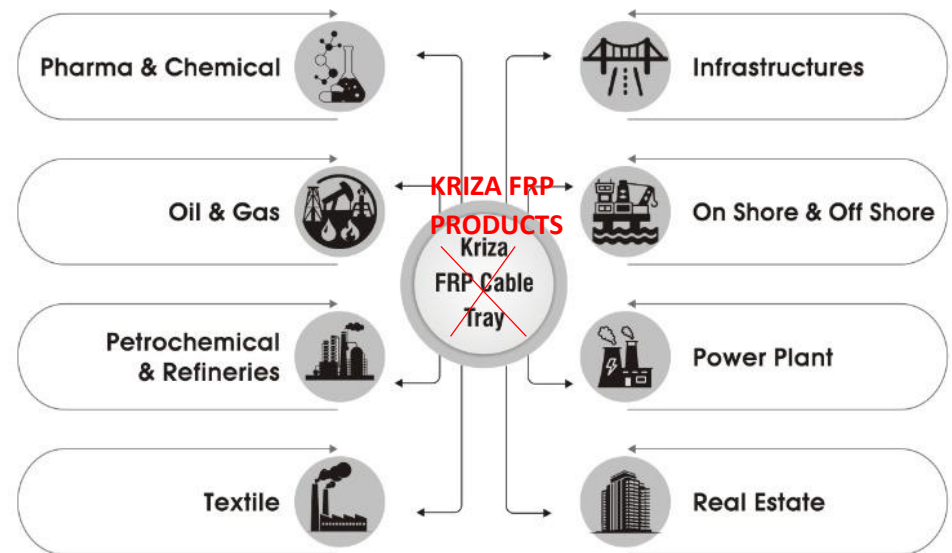

Kriza concentrates on to become world best manufactured in FRP/GRP Products.

MISSION

Customer satisfaction is at the heart of our business so we go above and beyond, delivering high-quality products, prompt services and personalized attention and earning our clients' trust.

CUSTOMER'S INDUSTRY SEGMENT

Advantages of FRP/GRP Products

- Corrosion and chemical resistance
- Thermal & Electrical non-conductor
- Fire Retardant
- High Strength
- Light in Weight
- Easy to Install
- UV Resistant
- Anti-Static
